VERNICIATURA A LIQUIDO

**GOOD-LOOKING,  
RESISTANT,  
MADE TO LAST.**

YOUR PRODUCTS FOR  
AFTER **PAINTING**  
BY PAINT COMPANY.

## EXPERTS IN LIQUID INDUSTRIAL COATING

At Paint Company we work with liquid coating and surface treatments and have more than twenty years of industry experience. Over time, committed research into new coating solutions, together with continued training has allowed us to win important contract orders at national level and to increase our production capacity as well as the quality of our services.

Today we work with four production lines in a plant covering an area of some 3,000 m<sup>2</sup>, where we manage to diversify our production according to material and processing type.

As well as **liquid coating**, which is our area of specialisation, we also work with **electrostatic coating, screen printing, pad printing and small-scale assemblies**, to give our customers a product with all of the surface treatments required.

## SECTORS

- Electrical appliances
- Automotive
- Furniture and furnishing accessories
- Lighting
- Doors and windows
- Fashion accessories
- Musical instruments

## PRODUCTS

Solvent-based coatings  
Water-based coatings  
Coatings made with agricultural waste

## MATERIALS

Metals  
Plastics  
Glass  
Wood

## CERTIFICATION

UNI EN ISO 9001:2015

## REACTIVITY IS OUR STRENGTH

Thanks to flexible work cycle programming, we are able to deal with very high production capacity as well as offer rapid response times. Turnaround times for each job are generally a week from acceptance of the order.

We work to partner our customers and suppliers when it comes to problem solving, and we are fully aware that collaboration is key to obtaining the best possible results in the fastest time. We also offer a willingness to listen, pro-activity, technical expertise, and research as an integral part of our services.

## QUALITY-CENTRIC

The common theme of our production cycles is quality control at every stage in the process; starting with materials, which are accompanied by the relevant certification before they can even be used in our coating process.

We can provide customers with certification documents for **colour, thickness, hardness and resistance, with testing in salt mist chamber.**

Our company has Bureau Veritas Italia S.p.A. certification for its Management System, compliant with the requirements of the ISO 9001:2015 standard.

## GREATER FOCUS ON SUSTAINABILITY

The chemical industry is constantly seeking new coating solutions that have a lower impact on the environment. Our systems are suitable for use with **water-based coatings** and for **coatings made using agricultural waste**.

Our training also means we can face up to the challenges posed by these new products in technical, quality and aesthetic terms, working alongside our customers to find the route to the best possible result.
